

ABSS Blast Cabinets

Suction and Pressure Units

In the competitive world of today's industry, economical surface finishing is important. The ABSS range of Blast Machines offer a total solution to mass finishing. The ABSS range of Blast Cabinets are proudly manufactured in Australia and are available in both Suction and Pressure Blast options. With a variety of accessories available, whatever the substrate, ABSS have a Cabinet that will suit your specific requirements.

It would be easier to consider cleaning, peening and finishing from the single perspective of surface preparation. ABSS believe that each function must be seen as a carefully fashioned part of the total plant operation system. At ABSS we strive to give each of our products a distinctive, precise balance in engineering design. Our engineering ensures that you are receiving the most advanced designs available today.

Pressure Blast

Offers the ultimate in blasting to provide an accelerated rate of cleaning. Typically 3-4 times faster than Suction

Dust Collectors

In order to make our blasting systems more efficient, we have developed two integrated dust collector designs. These finely balanced units provide maximum cabinet visibility and efficiency.

Made in Australia

Suction Blast

Combines the advantages of minimal compressed air requirements, standard mesh media and simple operating technique.
